

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: ByteForce

Project / Product Name: Streaming Live RAG

Organization / Institution (if any): VIT VELLORE

Submission Date: 30-09-2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes

3. Purpose of AI Usage (Brief Details)

Idea generation / brainstorming :Discussing and refining project and implementation ideas using GPT-5.6 Sol

Code generation or assistance: Used GPT-5.6 Sol/Terra and DeepSeek Flash V4 through OpenCode for coding assistance, implementation, and debugging.

UI / UX design: Used AI assistance for UI ideas and frontend implementation.

Content creation: Used AI to help prepare and improve project documentation.

Data analysis: Used AI-assisted scripts and discussions to analyse results and metrics.

Testing / debugging: Used DeepSeek Flash V4 through OpenCode and GPT-5.6 Terra to find and fix implementation issues.

Other NONE.

4. Feature Origin Classification (Please add/delete based on the number of the feature)

Feature 1

1. Feature Name: Streaming Early-Retrieval Controller

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool: GPT-5.6 Sol and DeepSeek Flash V4 through OpenCode. Prompt: Asked for help implementing early retrieval with provisional and final commits. Output: Suggested controller logic and code. Modification: We adapted the code to our pipeline and added stale-result handling.

Feature 2

1. Feature Name: BERT/Semi-Supervised Intent Decomposition

2. Self-Generated/AI-Generated/Both: Self-Generated

3. Description: AI Tool: GPT-5.6 Sol and GPT-5.6 Terra. Prompt: Asked for implementation help for a BERT-based intent-boundary tagger. Output: Training and evaluation code suggestions. Modification: We adapted and tested the implementation and reviewed the generated labels. The BERT approach was developed by our team.

Feature 3

1. Feature Name: Hybrid Dense/Sparse Retrieval and Reranking

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool: GPT-5.6 Terra. Prompt: Asked for help implementing BM25 + MiniLM retrieval with rank fusion and reranking. Output: Retrieval implementation suggestions. Modification: We integrated and modified the retrieval flow for our multi-intent pipeline.

Feature 4

1. Feature Name: Grounded Answering with Citations and Abstention

2. Self-Generated/AI-Generated/Both: Self-Generated

3. Description: AI Tool: GPT-5.6 Sol. Prompt: Asked for implementation help for source-based answers with citations and abstention. Output: Suggested validation and citation-handling code. Modification: We adapted it to return only supported source extracts and added our own checks.

Feature 5

1. Feature Name: Correction Handling and Stale-Result Rejection

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool: DeepSeek Flash V4 through OpenCode. Prompt: Asked for help handling outdated results after user corrections. Output: Suggested session-generation and invalidation logic. Modification: We adapted and tested the logic with our correction cases.

Feature 6

1. Feature Name: Selective Refinement

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool: GPT-5.6 Terra. Prompt: Asked how to update only the affected claim when new information arrives. Output: Suggested refinement and versioning logic. Modification: We adapted it to our claim structure and tested the behavior.

5. Ethical & Compliance Confirmation

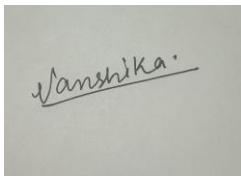

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: Vanshika Pathak

Role: Team Leader

A rectangular box containing a handwritten signature in black ink. The signature appears to be "Vanshika" written in a cursive style, with a horizontal line underneath the name.
